Project Design Phase-I

Proposed Solution Template

Date	5 October 2022
Team ID	PNT2022TMID05442
Project Name	Project – Skill and Job
	Recommender (Cloud Application)
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem	➤ In order to Enhance the
	to be solved)	Opportunities and challenges to
		provide job.
		> To Protect great volume of
		digital data
		> To Satisfy the on the basis of
		the need and requirement of
		satisfaction.
2.	Idea / Solution description	➤ To Reduce the Risk
		Assessment & Threat Analysis
		in the platform.
		Creating Prototype Solution so
		that user can access Easily.
3.	Novelty / Uniqueness	➤ On-demand self service which
		help the user to gain knowledge
		regarding on specified job
		Mobile end point security that

all the devices on their network and prevent unauthorized access. 4. Social Impact / Customer Satisfaction Frequently updating about requirements and Full filling the needs. User will get a Responsive speed Regarding the job they have searched. User friendly Layout and approach design. 5. Business Model (Revenue Model) Model) Commercializing about platforms in Social media, entertainment application so that user will have knowledge about our platforms how effective it is. Generating Revenue through the advertisement that display on the platform. 6. Scalability of the Solution Hyper scaling capabilities that includes the ability to provide			allows Organization to protect
4. Social Impact / Customer Satisfaction Frequently updating about requirements and Full filling the needs. User will get a Responsive speed Regarding the job they have searched. User friendly Layout and approach design. 5. Business Model (Revenue Model) Commercializing about platforms in Social media, entertainment application so that user will have knowledge about our platforms how effective it is. Generating Revenue through the advertisement that display on the platform. Kaling in Social media, entertainment application so that user will have knowledge about our platforms how effective it is.			all the devices on their network
4. Social Impact / Customer Satisfaction Frequently updating about requirements and Full filling the needs. User will get a Responsive speed Regarding the job they have searched.
